EXPERIENCE

SynapseFI (formerly SynapsePay)   Sep 2016 – Oct 2017
Software Engineer   *San Francisco*

- Moved rapidly between different roles according to changing company needs, including developer support, internal tools, and full-stack projects.
- Delved into new or unfamiliar technologies frequently, including Node.js, Python, Flask, React.js, Redux, Sass, Webpack, Express, Redis, Docker, CircleCI, and Selenium.
- Prioritized accessibility and cross-browser compatibility while building complex UIs in HTML, CSS, and JavaScript.

Freelance   Sep 2015 – Sep 2016
Software Engineer   *San Francisco*

- Built and maintained custom applications for small businesses, using Ruby/Rails, Postgres, Heroku, HTML/CSS, Jira, Node.js, and other technologies.
- Learned AngularJS over a weekend to quickly fix bugs in a legacy codebase.

Kairoi Healthcare Strategies   Sep 2013 – Jul 2015
Project Manager and Consultant   *San Francisco*

- Developed software designed to reduce appointment scheduling inefficiencies.

SELECTED PROJECTS

Insto (SynapseFI)

- Automated banking customer-screening and due diligence procedures using lip-reading, facial-recognition, OCR, and other cutting-edge technologies.
- Created a dynamic UI to render different flows and components based on highly variable, client-specific compliance criteria.

Ruby, Python, Node, and PHP SDKs (SynapseFI)

- Extended libraries to cover new endpoints, automatic authentication, native interfaces, and other features.
- Wrote comprehensive test suites used for vetting API releases.

EDUCATION

Dev Bootcamp, San Francisco, *Web Development*   2015

University of California, Berkeley, *B.A. Classical Languages*   2011
